Madico Achieves Global Certification to the ISO 9001:2008 Quality Management Standard

Woburn, MA - August 17, 2009 - Madico, Inc. one of the world's leading manufacturers of advanced laminates designed to increase human safety, security and manage energy, today announced that it has achieved global certification to the ISO 9001:2008 Quality Management Standard. Madico has implemented the new standard as part of its long-standing commitment to ensure consistent and exceptional quality across its operations. The audit was successfully completed on July 28 at Madico's corporate headquarters in Woburn, MA.

Madico first received ISO certification in 1999. The ISO 9001 standard is revised periodically by the International Organization for Standardization ("ISO"). ISO upgraded to its most recent revision in November of 2008. The previous revision, ISO 9001:2000, is still valid until 2010. However, Madico has taken the initiative to ensure compliance to the new requirements as early as possible.

According to Dan MacKay, Director of Manufacturing and Quality Systems, "We are proud of our commitment to superior quality and customer satisfaction. The ISO standard serves as our foundation for quality from product conception and design to manufacturing and customer service processes." He added, "The ISO 9001:2008 requirement for continual improvement complements our lean initiatives as well as our commitment to exceed customer expectations for sustained success."

About Madico Inc.

Madico Inc. has been developing innovative materials for more than a century. An unrivaled commitment to research and development has enabled the company to pioneer a number of industry-first products and processes for emerging safety and energy markets. The company's award winning Specialty Film products have been proven to increase protection and energy generation in the growing renewable energy sectors.
